***Claim Rejections - 35 USC § 112***

Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Line 2, the expression “of the when the device” is confusing.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Bayless U.S. Patent 4,265,454.

Bayless disclosed a flying toy comprising a planar body (10), a recess (16) extending laterally inward from the outer edge, the body defines first (18) and second (20) spaced apart engagement areas on opposite sides of the entryway; the recess is configured to define an enlarged area inwardly of the first finger engagement, the second finger engagement includes spaced finger engagement attached structure (top and bottom surfaces of member 20).

Claims 1 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Joun U.S. Patent 5,800,236.

Joun disclosed a device comprising a planar body (20) defining an outer edge; a recess (24) formed in the outer edge and including an undercut section and wherein the body is formed so as to define a hook section adjacent the undercut section of the

recess; a portion of the body adjacent the recess, opposite the hook section comprising a finger engagement section (23) defining a pair of wings (one on each side of section 23) and the wings are capable of being spread apart; the wings are capable of being used in the manner as claimed. The body comprises aerodynamic structure (21) or (25) associated with oppositely facing surfaces defined by the body for altering the movement of the device when it is launched by a user.

***Allowable Subject Matter***

Claims 2-6, 11-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 14, and 15 are allowed.
